

## ROBERTSON ASSOCIATE AWARD RECIPIENTS

This award is presented to those members who have fulfilled with commitment and success their obligation to the Association

### **Douglas Black** *Belleville, Ontario*

Born and raised on the family farm located south of Belleville, Ontario in Prince Edward county, Doug has had a varied career in agriculture. What was a typical mixed dairy farm in the 1930's – 1940's became a Registered Chick Hatchery from the late 1940's through to the late 1950's supplying farmers in the surrounding area with day old chicks for egg or meat production. In the 1960's the expansion of canning crops took place. Canning tomatoes, green peas and sweet corn were grown and sold to local canning factories. A herd of Registered Polled Hereford cattle was also started at this time.

The 1960's saw Doug start into the production of seed with the purchase of a small Clipper Seed Cleaner, which is thought to have been originally owned by Charles Bishop of Bishop Seeds. Larger cleaners and graders were added as the production of pedigreed seed increased. This association with CSGA has been continuous for over 40 years. A Select Seed Grower for over 20 years, Doug has enjoyed watching new varieties develop. Doug has been a member of SeCan and a founding member of Advantage Seed.

A family run accredited seed facility; Quinte Isle Farms has served local and Ontario markets. Seed from Quinte Isle Farms has in the past found its way to Europe and the United States of America. After nearly 50 years of producing and conditioning pedigreed seed, 2007 saw the closing of seed operation at Quinte Isle Farms.

Doug is married to Jean, his bride of 65 years. They have one son, George, who joined CSGA in the early 1970's and has been a CSGA member for over 30 years. George and his wife Joan have three children; Jessica, Stephen, and Katie and four grandchildren. Stephen has been a CSGA member since the late 1980's.

Stephen, along with his wife Jennifer, and their son, Carter are carrying on the family farm with the production of pedigreed seed, cash crops and fresh market vegetables. The legacy of top quality products with reliable service to their customers is still number one at Quinte Isle Farms.

Doug is very proud to receive the Robertson Associate award and thanks the CSGA for this great honour.

**Dan Kirkham**  
*Saltcoats, Saskatchewan*

Dan farms with his wife, Fran, and son Rob in the Saltcoats, Saskatchewan area. Over the years they have grown and processed cereals, oilseeds and pulse crops. The family currently farms about 6000 acres.

Dan received his Diploma of Agriculture from the University of Saskatchewan in 1974. He began farming and producing pedigreed seed in the early 1970's. Dan is very honored to receive this award and will be the fourth consecutive generation in his family to be recognized in this way.

Over the years Dan has served on many local committees including Minor Sports, Curling Club and Scouts. Dan served on the Board of Directors of S.S.G.A. for eleven years, two of them as President. He still enjoys attending Seed Grower meetings and events.

Dan and Fran are the proud parents of four children. Their oldest child, Rob, has a Diploma of Agriculture from the University of Saskatchewan and farms with his parents. His wife Sheri is a R.N. with Public Health in Yorkton. They have two daughters; Katelynn, 3 years and Skylar, 9 months. Lisa has a Bachelor of Science in Agriculture from the University of Saskatchewan and is working at the Canadian Food Inspection Agency in Saskatoon. Kathy has a Bachelor of Science in Social Work and works in Bonnyville, Alberta for Child Services. Their youngest daughter Janice, graduated a year ago from Brandon University with her R.N. and is currently working in the Emergency Room at the Royal University Hospital in Saskatoon.

Dan and Fran still enjoy farming and the challenges it brings. They have had lots of fun in their travels across Canada representing seed growers. Their future plans include continuing to enjoy their grandchildren and traveling in their vintage Mustang.

**Keith Scott**  
*Boissevain, Manitoba*

Born in 1952 in Boissevain, Manitoba Keith has always loved nature and the country way of life. At the early age of eleven Keith was working in the fields along side his father, Doug. Both of them learned about the challenges of growing new crops and how important it was to stay ahead of technology.

In 1970 Keith attended the University of Manitoba to study agriculture and upon graduation was hired at the seed plant “Century Seed Service.” Within nine years Keith became plant manager and “Scott Seed Farms” evolved. The seed plant was part of the bulk seed certification program in Brandon.

The certified seed acreage grew over the years and Keith became a Select grower. The many years of seed production were rewarding, sometimes challenging, but always memorable.

In the early 1990’s the late Marie Greenius, former president of CSAAC asked Keith to let his name stand for director on the MSGA board. Keith was on the board for 11 years and was president for a 4-year term. Keith was also involved in the MSGA Seed Industry Study release that highlighted the contribution that the pedigreed seed industry makes to the Manitoba agricultural economy.

Keith and Louise were married for twenty-six years and enjoyed the farm life and raising their two children, Lisa and Jason. Both Louise and Keith were involved in their community. Keith was on the co-op & Manitoba Pool Elevator board for twenty-seven years. Louise passed away after a two year battle with cancer. In 2004 Keith married Shirley Swart whose husband had also passed away from cancer. Over the years Keith and Shirley have blended together a family of five young adults, one granddaughter and one son-in law. They are very proud of each of them as they pursue their careers. Keith and Shirley are enjoying their own new career paths by helping families become financially independent. They operate from an office in Brandon, Manitoba.

Keith has always believed that he gained more from the seed industry than he was ever able to give back. The mentorship and valuable experience will always be a part of Keith's life.

**Blaine Sudom**  
*Avonlea, Saskatchewan*

Blaine was born in Avonlea, Saskatchewan in 1948 and was raised on the family farm at Avonlea. He attended school at Avonlea and at the University of Saskatchewan and in 1971 graduated with a Bachelor of Arts degree in Economics. Blaine worked as an economist with the Saskatchewan government from 1971 to 1975. In 1974 Blaine married his co-worker Lorraine Buen and in 1976 began farming with his brother Michael in the Avonlea area.

When Blaine began farming he observed that the seed growers in the Avonlea district seemed to be the most progressive and innovative farm businesses in the area. Blaine became interested in the benefits of new seed varieties and high quality seeds and worked with Lorraine and Michael and their families to establish a seed business for their farm.

The first seed crops were produced in 1977 and several seed plants were built and expanded over the years. Blaine was particularly interested in the production of new crops and improved varieties. Their seed business has concentrated on the production and testing of special crops and new varieties. Over the years they have managed varietal trials and select and breeder seed production for numerous plant breeders and seed companies.

In 1994 Blaine founded Emerald Seed Products Ltd. with the goal of adding further value to several of the newer crops grown in the area with an emphasis on fenugreek. Emerald Seed Products has supported a plant breeding program for the development of new fenugreek varieties with improved qualities for the production of nutraceutical and food ingredients. In 1998 Emerald Seed Products constructed a process plant to extract nutraceutical ingredients from special crops and in 2004 a larger scale process plant was built to GMP standards to produce new ingredients for health, food and industrial markets.

Blaine and Lorraine have raised four children and have enjoyed working together in their seed business and many community activities. Blaine and Lorraine continue to enjoy the challenges and rewards of operating their farm and processing businesses, and also enjoy spending time with their family and travelling.

## Anne & Henry Vos

*Fairview, Alberta*

Anne and Henry first met at the University of Alberta in the mid 70's. They graduated from the faculty of Agriculture in 1977. After pursuing different career directions and locations, they were married in 1981. At that time Anne was a District Agriculturalist for the government of Alberta and they decided to purchase land together at Keg River, Alberta, an hour north of Manning. Henry's grandparents and then parents had farmed at Keg River since the early 1900's. This is where they got their start in the seed business.

In 1990 Henry and Anne bought a new farm in the Fairview area of the Peace region and continued to grow, process, wholesale and retail seed, as Peace Pedigreed Seed. They expanded their market area over the years to include the entire Peace and beyond. They were also involved in small plot research, starting a business putting out plots for private companies and collecting data for GLP studies.

Like all seed farmers, Henry and Anne juggled the challenges of growing commercial crops on a large scale, with processing seed, acquiring and multiplying new varieties to improve the lot of their fellow producers, operating a retail business, and building a great quality of life for their family. The Peace country contributed its own unique challenges like a relatively short growing season and long traveling distances.

Henry enjoyed contributing to the betterment of the cropping industry with his board work. Over the years he served as a founding director of Canterra Seeds, the President of the Alberta Branch of the Canadian Seed Growers and a director on the board of CSI. Besides all of his seed industry commitments, he was also involved in the Ag and Food Council of Alberta, AARI, the Alberta Canola Growers Commission, Prairie Canola Council, the Fairview College Board of Directors, and Councilor for the Municipality of ID 22. In 2007 Henry was elected as a director for the Canadian Wheat Board.

Needless to say, all of Henry's travel out of the Peace country required someone to keep things going on their busy farm. Anne filled all positions at one time or the other. In recent years, having excellent staff and kids that could help more, she was able to concentrate more on administration, seed sales and finances. Her interest in business motivated her to complete an MBA in 2007.

Together Henry and Anne also raised two girls, now both in University. Both girls seem grateful for having been able to experience the now somewhat rare lifestyle as family farmers. Sydney completed second year at the University of Alberta and is working as a plot technician for the summer with Pioneer Hibred in Edmonton. Allison completed first year at the University of Victoria and is employed with Bayer crop science as a research technician.

Things have changed a lot since 1981 and continue to evolve. Peace Pedigreed Seed has grown many different crops, everything from corn to fescue to sunflowers. Of these about 15 different crops, only three have been controlled substances, hemp, barley and wheat.

While now less involved in the seed business, Henry and Anne continue to be active in new business interests and farming.
